

blasco[®]
A Taste World

WHERE NATURAL QUALITY REACHES **EXCELLENCE**

Here at Blasco Fruit, we specialise in the production, sale and export of Spanish fruit with quality guaranteed by Global G.A.P. certification.

Opened in 2018, our new facilities in Segorbe (Castellón, Comunidad Valenciana) allows us to provide a **traceability guarantee with product excellence** as a top priority.

We are involved at every stage, from cultivation to handling and packaging, fully capable of supplying the several markets we work in, both nationally and internationally.

We make a name for ourselves by our continuous and regular supply of persimmons and stone fruits throughout the entire season, maintaining the highest standards of **flavour, texture and appearance**.

PRODUCTION.

FROM FIELD TO MARKET, INNOVATION IS ABOUT MAKING IT SIMPLE

WE ARE WE ARE
DISTINGUISHED BY A
DEEP-ROOTED TRADITION
OF EVOLVING TO THE
RHYTHM OF YOUR
DEMANDS

We control the entire process of different **KAKI** varieties such as Persimmon and “tomatero”. We are established in the market with the highest production in the world, and we feel represented by a fruit whose virtues are recognised and enjoyed across the globe.

APRICOT

Apricots are a popular summer fruit. With the highest quality criteria, we participate in their harvesting, handling and packaging from start to finish.

NECTARINE | PEACH | SATURN PEACH

Blasco Fruit's offering also boasts a wide range of stone fruits, such as nectarines, peaches and Saturn peaches. Just like the other products we bring to the market, we fully dedicate our effort and resources to ensure the highest quality.

INARSE

QUALITY.

CERTIFIED TRACEABILITY: A LABEL FOR THE SUPERIOR

At Blasco Fruit we take great care over our products from seed right up to when they arrive on the market, using a control system that is internationally recognised with the GLOBAL G.A.P. agrifood quality certificate.

We use our own quality department to perform constant and demanding tests during entire life cycle of the fruit, both in pre-harvest activities, such as soil management or phytosanitary applications, as well as the perfect packaging or optimum temperature conditions in the cold chain and other features such as hardness or sugar level.

In addition, our handling centre operates in compliance with the HACCP system to examine critical points, as well as reviewing our Occupational Risk Prevention System every year.

EXPORTING TRADITION: WE NURTURE THE WORLD

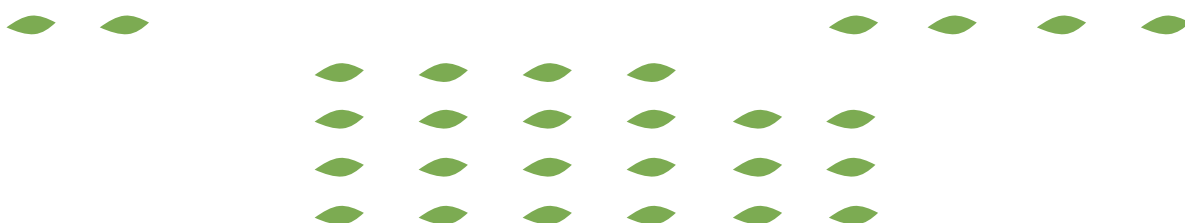

A growth without limits thanks to key alliances with transport companies that allow us to reach any market in the world with the necessary equipment to preserve the best performance.

**CONSOLIDATED PRESENCE IN
